Introduction

About Us:

Fargo Group of Industries established "Ayesha Pipe Industry" in 2016 through 50 years of sustained manufacturing expertise. The professional blend of dynamic leadership and many years of experience in imported SS pipes have brought API well ahead of all its competitors. Today it's the largest SS pipe manufacturer in Pakistan with a huge range of shapes and sizes. A state of the art Testing Laboratory, Quality Testing Management System and our Customer Satisfaction make us stand out nationwide.

Aim:

To foster a culture that promotes an awareness of our customer's needs and perspective with a view to recognize the importance of each employee's commitment to quality and successful achievement of organization's objectives.

Objectives:

To promote awareness of Quality, Environmental, Health and Safety issues.

Comply with all legal and other applicable requirements.

Manufacture and deliver quality products consistently to our customer through a professional International Standard Quality Management System.

Maintain healthy relations with customers, suppliers, employees and all interested parties.

Train and continually improve the competence of our human resource through regular training sessions with qualified professionals.

Research and Development in line with latest industrial trends to be in step with future.

Features:

- Non-magnetic
- Excellent aesthetic appeal with high end value for money
- Suitable for all indoor and outdoor uses (including coastal areas)
- Excellent in welding, bending and shaping
- Available in bright, satin/euro and hairline surface finish
- Special profiles & sizes can be produced on request
- All tubes available in 6.1m (20ft) and are packed as per international standards
- High Nickle Conten
- Low Carbon
- Easy Bendability
- Stunning Shine
- Huge Range of Sizes & Shapes
- The Best Quality in Market

Our Support:

To Establish a long term win relationship with all our customers.

Our Tenet:

High Quality and Unique Product.

Customer Service 24/7

Comnon Development and Benefit Sharing

Introduction

Stainless Steel Square Pipe/Tube

Square tube: size from 12*12 mm to 101*101 mm

Wall thickness: 0.4~2.0 mm Material: 201 series,304 series

Surface finish Mirror 600#, satin/hairline

The products have beautiful appearance and high quality, are widely used in architectural decoration, furniture, etc

Stainless Steel Round Pipe/Tube

Round tube: OD 9.5 to 101.6 mm

Wall thickness: 0.4~2.0 mm Material: 201 series,304 series

Surface finish Mirror 600#, satin/hairline

The products have beautiful appearance and high quality, are widely used in architectural decoration, furniture, etc

Stainless Steel Rectangular Pipe/Tube

Rectangular tube size from 10*20 mm To 80*80/50*101 mm

Wall thickness: 0.4~2.0 mm

Material: 201 series, 304 series

Surface finish: Mirror 600 #, satin/hairline

The products have beautiful appearance and high quality,

are widely used in architectural decoration, furniture, etc

Infrastructure

Quality and Testing

The core of everything world-class is 'Quality' and at Divine Tubes are no exception to it. Our commitment to quality applies to each product and each process. Our Research and Development facility is equipped with state of the art facility to conduct metallurgical and mechanical tests to ensure highest standards as per ISO 9001 -2000. On the materials procurement front, we ensure that our raw materials are sourced from only trusted vendors of international repute. We by implementing tests as well. To our core qualitative approach is further strengthened by the fact that our products are offered after approval of renowned engineering consultants, Inspection agencies and statutory authorities.

Eddy-Current Testing

This test is conducted to detect sub surface defects. It is carried out by using techno four flaw marking detection system on the entire length of the tubes as per the E426 with hole or notch standard.

Mechanical Testing

Mechanical Testing adheres to ASTM standards and is conducted for tensile testing, flaring, flanging, flattening, reverse bend lest, etc.

Hydro Test

We conduct 100% hydro testing on a hydraulic test bench using a high-pressure pump on all pipes & tubes. The tests also fully comply with ASTM A 249/13316-1992 standards.
